Career Objective

Electronics and Communication Engineering undergraduate seeking an opportunity in embedded systems and IoT domain to apply academic knowledge, contribute to real-world projects, and gain hands-on industry experience.

Education

Bachelor of Engineering – Electronics and Communication Engineering

Canara Engineering College, Mangaluru

(Visvesvaraya Technological University, Belagavi)

CGPA: 8.65

Expected Graduation: Oct 2027

Skills

Technical Skills:

- **Programming Languages:** C, C++ (Data Structures & Algorithms)
- **Embedded Systems:** Arduino, ESP32, GPIO, I²C, UART, Sensor Interfacing
- **Electronics & PCB:** Circuit Design, Soldering, Debugging, Component Testing
- **Tools:** NI Multisim, Keil u Vision, Arduino IDE, Eagle CAD, MATLAB(basics),Solid Edge
- **Operating Systems:** Windows

Core Competencies

- Embedded system prototyping
 - Sensor integration and IoT device interfacing
 - PCB prototyping and circuit debugging
 - Hardware–software system integration
 - Technical documentation and testing
-

Certifications

- NPTEL – Embedded System Design
 - Embedded for Beginners – NIELIT
 - ESP32 Microcontroller Training – Kakunje Software Pvt Ltd
 - C Programming Training
 - Arduino Certification – Spoken Tutorial (IIT Bombay)
-

Achievements

- Winner – IoT League Circuit Design Competition
Shree Devi Institute of Technology
 - Winner – Circuitrix (National-Level Circuit Build Competition)
AAKRITI Technical Fest, Canara Engineering College
-

Projects

AquariumIQ: Real-Time Control And Monitoring

(Aug 2025-Present)

- Developed an **ESP32-based IoT monitoring system** for aquarium parameters such as temperature and water level
- Implemented **sensor interfacing and embedded firmware** using Arduino IDE.
- Designed **modular hardware architecture** enabling plug-and-play sensing modules
- Integrated **mobile connectivity for remote monitoring and control**
- Performed **system debugging and reliability testing**

Automatic Solar Panel Cleaning Bot

(Sep-Oct 2024)

- Designed an **automated solar panel cleaning system** using microcontroller control
- Implemented **motor-driven cleaning mechanism with timer automation**
- Integrated sensors to improve efficiency and reduce manual maintenance
- Built hardware prototype and performed **circuit testing and debugging**
